

# Devesh Rajadhyax

Innovator, Entrepreneur, Communicator, Motivator

Devesh's 18-year journey across software product development has built a strong passion for solving problems. His mantra: the bigger the problem, the more innovative the solution will be. Devesh's current innovative focus is to bring the benefits of latest technologies to healthcare.

Developing innovative solutions involves an equal share of people management. Devesh has mentored many of his team members and motivated them to derive excellence through passionate dedication.

Over the last 18 years, Devesh has made immense contributions that prove his passion for technological innovation. He is the co-founder of three entrepreneurial initiatives:

A keen enthusiast of artificial intelligence (AI), Devesh envisions a technology-enabled future where AI can overcome every challenge posed to humankind. This interest led him to create an interest group called Artificial Intelligence, in Mumbai, which brings together like-minded technologists in the quest for AI solutions.

As co-founder and Mentor at Smartify Health, Devesh would ensure vibrant organization culture and technology excellence
